RE: 2020 Water Main Project

Dear Property Owner/Resident:

As you may be aware, the City will be replacing the existing water mains this year at the following locations:

- Arbor Avenue, Leon Street to Griesbach Street (up to 2071 Arbor Avenue)
- Griesbach Street, Lawnel Blvd. to Arbor Avenue
- Griesbach Street, Arbor Avenue to Renner Avenue
- Griesbach Street, Reneer Avenue to Southwood Avenue
- Reneer Avenue, Leon Street to Greisbach Street
- Miller Road, Randall Road to Lake Drive

Work on this project may start as soon as early as May 11, 2020 with the removal of driveways, lawns and topsoil along the route of the proposed water main. Traffic through the work zone will be affected with lanes and shoulder closures and occasional flagging operations; however full street closures and delays should be expected. Access to your driveway may be blocked for a couple of days to allow for construction in front of your home. Our contractor will coordinate with you regarding any necessary closure of your driveway. Work within your area should be limited to 8 weeks or less once started, with all work to be completed by early September 2020.

It is possible that you or your neighbors may have plantings and/or sprinkling systems within the public right-of-way (ROW) where work will be done. The City cannot be responsible for protecting these items, but we hope you will look over the ROW at your property. If you find there are valued plants or other items in or near this area it would be advisable that they be relocated prior to the start of the construction. The ROW is estimated to be 33-feet off the road center line.

The City would also suggest that if you have not done so already, that you sign up for nixle e-mail alerts at www.nixle.com or check the City's Facebook page. These alerts will provide frequent construction updates on this and other City projects.

If you have questions, concerns or encounter any difficulty related to the construction, please notify the Department of Public Works at 231-799-6803. Hopefully we will be able to resolve your concerns appropriately.

Sincerely,

James R. Murphy
City Engineer
